

# EXECUTION POLICY

Global Market Index LLC

## EXECUTION POLICY

- 1. SECURITY IN EXECUTION.** GMI operates with variable spreads and all orders are executed at the best available market price.
- 2. HOLIDAY, WEEKEND EXECUTION, VOLATILE OR ILLIQUID MARKETS.** If the market opens with a break off after a weekend or holidays, upon release of important economic and political news, or in the case of force majeure events; orders (sell stop, buy stop, stop loss) are filled at the first available prices in the market.
- 3. FILLS ON STOP – LOSS AND LIMIT ORDERS.** Placing stop orders prior to the release of financial news is not permitted, such orders maybe rejected, deleted, or filled at the best available market prices at that time. Orders (sell stop, buy stop, stop loss) are filled at the first available prices in the market.
- 4. Trade Size ON MARKET ORDERS.** Trade up to 5 million with a simple click, as we will execute market orders up to 50 lots (5 million). However, if you intend to deal in bigger amounts, you will need to split trade size.
- 5. EXECUTION SLIPPAGE.** Slippage occurs when the bid/ask spread changes between the time the order is requested and the order is executed at. When the order is sent for execution, the specific price requested by you may not be available. In this case, the order will be executed at the first available market price. Slippage happens during high periods of volatility, such as during important news or economic data releases. You should know that ‘slippage’ is a normal market practice and we are not responsible for it in any way. GMI assumes no responsibility for slippage occurred because of any problems or technical malfunction of any networks or lines, computer online systems, servers or providers, hardware or software, or any technical failure because of technical problems or traffic congestion on the Internet or the website, or the trading platform.
